A MYTHOANALYSIS STUDY ON WOMEN IN THE NOVEL OF MICE AND MEN BY JOHN STEINBECK

Gibran Banhakeia
Mohamed First University, Morocco

Abstract: This research aims to deconstruct the essential images of women during the period of Puritans that reside in the deeply mythologized text of John Steinbeck (Of Mice and Men) and this paper will also analyze how biblical texts are paradigms of inferiority, inasmuch as sacred texts that define women as bodies of sexuality. Henceforth, this research can elucidate the vague side of women in comparison with religious texts in “Of mice and Men”. We will analyze Steinbeck’s collective consciousness from his texts in order to understand his personal background on women that means we will also grasp the position of women that lived harshly during the momentum of Great Depression.

Key terms: Women, Steinbeck, Images, Sexuality, Bible

INTRODUCTION
The History of American literature retells to its universal public that there are positive and clashing conclusions about the unsaid realities of women that cannot be retold again through the eyes of feminist writers who skipped admitting how religion plays a dangerous role of exploiting women. During the so-called period of “Great Depression”, the role of women is socially eradicated, inasmuch as they undergo through this difficult period of misery, crime and imprisonment. The vague image of woman lets us today to scrutinize how religion mythologizes the collective consciousness of John Steinbeck even if he paradoxically defends the status of women that we clearly deconstruct through this writing. Hence, this research would focus on the unvoiced issues of culture of women through John Steinbeck’s novel “Of Mice and Men” in the light of portraying the status of an ordinary, American Woman that is
symbolically exploited and badly described and paradoxically defended by religious texts. Therefore, it is a must to analyze literary, political and religious conflicts shape the world of Steinbeck in that we restate that the world of Hollywoodean Stars is something far away from the reality of (rural) Californians. The inaccurate image of sexuality on females is still existed in United States despite the role Postmodernism plays such far-reaching advances in revising the mistakes of puritans. Nevertheless, this study will not deconstruct the image of women’s today, inasmuch as we vehemently attempt to shed more light on how writers of the Twentieth century - John Steinbeck – define religiously and defend socially women through his artistic descriptions that put him in the situation of being as a paradoxical writer.

It is effectively true that this research is bound to explore biblical tracks and social trails that structure as the main part of conveying how negative feedbacks on women are predominantly registered in America. Secondly, The clashing moments of Women should be analyzed by looking to the historical and social images of their lives to contextualize “The Bible” primarily as the inspiration of this author in the hope of showing how religious group (Puritanism ) is the mainstream ideology of developing American literature and deteriorating it , nonetheless this period , doesn’t only develop literature , but it truly depicted women mentally to be defined only as “bodies of sexuality: This spot would direct us to scrutinize two focal ideas: John Steinbeck is unconsciously dominated by the realm of religious ideology that is the reason he described them as “Sexual Creatures”. But, he paradoxically defends them socially. In a nutshell, this inquiry is paradoxically as the main problematic statement, albeit it contains two essential objectives:

1. To demonstrate John Steinbeck uses symbols of religion when he describes women to convey them as bodies of sexuality
2. To clearly explain how he defends women, paradoxically.

It is granted studying religious mythology in John Steinbeck’s novel – Of Mice and Men, is not such an easy to task to being with, but mythocriticism would be as the essential tool to analyze the gap of collective conscious of Steinbeck.

Research Questions:
1. Why did Steinbeck portray Leeni as someone who hates Women?
2. Why does Steinbeck describe the negative side of women through religious texts?
3. Why does he defend them socially?

METHOD
This text takes form of an eclectic strategy, seeing that we are about to scrutinize different elements of American history of mythocritical analysis in such a way to grasp the dazzling gap of religious images that define woman as a “corpse”. This method depends evidently on our analysis to see how the author is negatively and positively depicted the position of women.

The image of Women through the eyes of American Puritans:
In view of the potential Image of religious texts in Modern American literature, writers like John Steinbeck are clearly influenced by the domination of Puritanism even this quality is not mentioned in his biographical events, but it is a noticeable image
of the most American authors of twentieth century. The era of puritanism is revealed as the momentum of suffering that put females into difficult situations of exploitation. In fact, reading what Peter B. High says about this movement is extremely fearful:

Unlike the Puritans who saw man as a sinful failure

The first religious settlers in American are “Puritans” as well they were not democratic people due to the fact the radical texts forcefully colonized their thoughts. Whenever and wherever they find men or women who do not obey the rules of god, they are considered as the followers of Satan. Everybody has to be present at the Church, if something goes wrong inside the church, thereby they have to find the main cause of this curse by fetching houses of ordinary people and till they find the so-called “this female witch” ; those who stay at home and do not go daily to the house of god “The Church” should be called “Snakes”. To say it differently, this period is characterized by the rules of theocracy, which means the laws of society and the laws of religion are equal. The role of woman in American society is such a vague question that demands myriads of historical researches in the light of providing such convincing results that explain some negative images of women that were dominated by puritanism. After a long period of harshness and abduction; after many years of considering women as witches, even witchcraft is a poorly way of earning money because of poverty and whenever women choose to change their religious rules or forget to assist in the church, they are instantly considered as dangerous witches; then, they are immediately perceived against the faith of god. Consequently, Puritans treat them with isolation and alienation, to the extent they can be killed in the name of God:

“The 1960 was the time of great witchcraft panic. In the town of Salem, Massachusetts, Young girls and old women were arrested and put into trail as witches. A number of these people were put to death for selling their souls to the Devil”2

Puritanism can be contextualized in this sentence: God sends them to ultimately deliver his message wtrough biblical texts to deliver this sacred message, universally. The very eminent aspect of teaching morality is transmitted by radicalizing and purification. Nevertheless, the role of woman is hardly perceived in the bible, in most cases, she is defined exclusively as a body of sexuality. When Cotton Mather admits, while he was writing his entitled book “Magnalia Christi Americana” that the attitude of choosing women as witches was a mistake, but it was a good way to stop them. The first puritans have always been considered as the non-democratic people that lived a long time ago in the land of America. This radicalization is a way of not behaving normally with humanity. The world of brutality begins with a group of writers that set up rules of puritanism and everything which is out the biblical context is seen a sinful way of live.

“The New England Puritans, and some other protestant groups, believed that the theatre was an invention of the Devil” 3

It is granted that there are women writers that have no ability to expose their writings in the realm of fiction, because it was against the will of god. If someone attempts to write a particular story, he could be directly condemned as a user of the Black Magic and then nobody wants to write novels because of not getting into social troubles:

“Novel had been considered a dangerous form of literature by the American Puritans. Novels put immoral ideas into the heads of young people”3
Most of writers were writing themes that are totally in contrast with women deeds “Treachery”, “Sexuality”, “Fidelity” ….; the first puritan writer, Edward Johnson, writes The Wonder-Working Providence of Sion’s Saviour in New England (1950); then, Thomas Hooker writes (1586) A Survey of the Summe of Church Discipline (1948); then, the emergence of John Coton’s book Ways of Churches of Christ in New England (1645). Then, the family of Mather wanted to make a change in order to provide democracy rather than considering religious democracy as the only existed purely moral lessons: Richard Matter (1596) the founder of this family and he was the Puritan minister; Increase Mather (1939) writes his unforgettable book that violated the history of feminism, Remarkable providences (1984). He was the eradicator of witches, as many old women and young women were arrested and killed, inasmuch as they were practicing Witchcraft.

Even if American literature cannot admit the unvoiced issues of religion, Modern Writers wrote about it and they consider themselves as victimized authors of historicism: John Steinbeck, is obviously influenced by religious texts and this impact is scanned in this writing systematically through logical investigations, particularly, the way he describes woman. He inspires more from the paradigm of religion, inasmuch as there are tracks of symbolic terms that makes us to consider Steinbeck as puritan writer, not as a modern writer. The commencement of brutality stopped shortly after the death of such radicalized Puritans, but the spirit of believing in witchcraft continued to be exploited in Modern literature as an archetype concept in order to produce great novels.

Social and Biblical Images of Women of Steinbeck’s Mental Thinking:
The incipit begins with the description of nature that is somehow the land of California, and then the author describes a simple woman as if she is culturally disoriented person as well as if it is something that is only attributed to the world of pleasure. This appearance bothers mostly the readers of Twentieth First Century, due to the unplaced position that Steinbeck creates to women through his narrative texts, in that the status of woman is badly described:

“Lennie's face broke into a delighted smile. "Why sure, George. I remember that... but... what'd we do then? I remember some girls come by and you says... you says..." The hell with what I say”

The first impression the reader gets through this citation is that Leenie belongs to an illiterate social class. His stuttering makes him a stupid person whatever he utters such words he add “S” to every uttered sound, seeing that Steinbeck chooses deliberately this person in the light of depicting how this rural man thinks, because he never have had the chance to be at school. Therefore, the educational background of this character is a tool to deconstruct how peasants reckon on women. This upon quotation detects the negative impact upon women, because it symbolizes here as the realm of sexuality and pleasure. In fact, this is verily essential due to the fact the most of American Californians do agree upon this hellish description of women and this explains Steinbeck’s writings are realistic to some large extent.

Another point that must be overlooked is that - how religiously isotopic composition is used in Steinbeck’s novel as the corpse of this humanity that is never undone the role of man:

“And the rib, which the Lord God had taken from man, made he a woman, and brought her unto 
the man” 5

As the bible mentions that the creation woman is due to the existence of manhood: it says that the rib of man is taken from him so that to produce what is known today as women. According to this biblical quotation, woman is not free in terms of liberty and actions; nonetheless she is extremely attached to man in everything. Illustrating this biblical sense is pivotal in the hope that readers can deconstruct religious meaning from Steinbeck’s strategy of his narratology. This is clearly coupled as soon as Steinbeck blindly reflects myriads of symbols “Woman” and “Snake” and Jesus” in this novel that harshly over-symbolize his narrative structure of his texts to mythologize the sense of his sacred meaning, to be completely influential in American Literature:

“A water snake glided smoothly up the pool, twisting its periscope head from side to side; and it swam the length of the pool and came to the legs of a motionless heron that stood in the shallows. And the beak” 6

This seems somehow bizarre relation between “woman” and “snake”, forasmuch as the readers will not understand the relationship between two binary oppositions that are indeed conveyed in the American History: the image of snake relates woman’s actions as it symbolizes something vicious that would be happen sooner or later. All “Women”, in the earlier period of puritanism, do not obey rules of puritanism were considered “Snakes” which is the chosen name of women that never believed in the will of god. Whenever we get across with this word “Snakes”, it would lead us to revive the period of Mather. At that time, women were killed and murdered because of considering them as Witches. A Snake was another adjective to categorize women as witches that choose to be out .John Steinbeck narratologizes his text through using symbolic images as religious devices to produce the beauty of Modern Literature and this attractiveness is provided as soon as he uses Snakes as sinful images of women and this explains why he chooses to evoke the word “Snake” in the end of Mice and Men. Therefore, the author manipulates his characters to be occurred in all difficult situations and the word is a hint for the reader to detect.

Steinbeck knows exactly from his own experience that women are considered something that is attributed completely to men, seeing that during that period American Society suffers from the so-called “Great Depression” that globally affects the economy of the United States. Man suffers at that time from poverty and unemployment. Nonetheless, women were not even considered as human beings and most of them were put as prostitutes to work days and nights in the big houses of prostitution “Brothels” with other victims. Most of them were killed due to that fact that they refused to work as prostitutes, but, in the end, they died courageously. Regardless the negative images of prostitution, women were slaves to men. The author depicts this mysterious reality; for example, when this woman wants to achieve her dream to be a famous actress in Hollywood. She was living the rural mountain of California and waiting for her promised lover to come and to get her into the right place of her dream

“She went on with her story quickly, before she should be interrupted."'Nother time I met a guy, an' he was in pitchers. Went out to the Riverside Dance Palace with him. He says he was gonna put
me in the movies. Says I was a natural. Soon's he got back to Hollywood he was gonna write to me about it." She looked closely at Lennie to whether she was impressing him” 7

This image shows sadly how women were not fortunate to express everything they wanted to be and the dream was something that is impossible to realize without a real man. Steinbeck’s is very critical to the point that he uses his symbolic reflection in his narrative writings to change things and to discuss themes that cannot be talked publically during that time of misery and sexual exploitation. Though women are now being outlined as equal to men, though feminists writers of 40’s or before {Mary Ritter Beard (1946) ; Woman as a Force in History : A Study in Tradition and Realities ; Evelyn Reed (1954) , The Matriarchal-Brotherhood : Sex and Labor in Primitive Society } , Though Steinbeck’s book The In Dubious Battle reveals the same issues of neglecting women and considering them as objects of sexuality “Prostitution”, this image of inferiority was explored from American society and extracted from realistic cases of women since woman was always as a heritage slave of man as well as this harsh situation is demonstrated when this woman was waiting her lover to put her into the promised position of being as an actress . In the other hand, most of women of this era are contextualized as bodies that men needed for sex and this selfish images portrays how life and reality are two different elements for women. In this quotation, there being positive images about women sensitivity and love that deconstruct how women at the time were totally passionate, kind and open minded:

“She knelt in the hay beside him. "Listen," she said. "All the guys got a horseshoe tenement goin' on. It's on'y about four o'clock. None of them guys is goin' to leave that tenement. Why can't I talk to you? I never get to talk to nobody. I get awful lonely." 8

This model of looking at woman is sensitive and gentle, because she wants to be heard and she needs lovely sex rather than brutally sex. In fact, she interacts Leenie to listen to his full story and to attract his desire at the same to arouse his sexual feeling and this is a normal quality of live before sex would begin, but it is a positive act. In the previous descriptions, women viewed as infidels and inappropriate creatures in American society, due to the domination of religious texts in American society that eradicates their status in literature. Even if there were women that attempted to write about their sexuality and to express their emotions through literature, nonetheless it was a period massacre and killing.

CONCLUSION

The role of women was not a clear message, inasmuch as it was the realm of alienation, binary opposition, desire, slavery and sexuality. The bible unfortunately, contextualizes the inferiority of woman as if it is a belonging to men and they shall do no mistakes, otherwise what is known as “malediction” and “curse” would curse the whole humanity and everything would be disastrous because of this infidel woman. Steinbeck’s texts are very directive, forasmuch as they explain how Californians think about woman. He defends woman as the Priest in his writings as if we are reading the bible that is why the reader would see a huge biblical vocabulary which means Steinbeck
reads many times the Bible and then he begins writing novels as if he is reading the bible again and again. According to his biography, Steinbeck’s stopped his writing once he gets into personal troubles with his jobless routines and it was his lovely woman that takes care of him in every moment to support him with the living conditions. Despite his difficult life which is full of tragedies, his lover loved him and helped him produce the greatest novels of American Literature that won Nobel Prize.
